

Computer: Inputs $\rightarrow$ Process $\rightarrow$ Output.

Algorithm: a step by step process to solve any problem.

How to Solve problems by using computer?

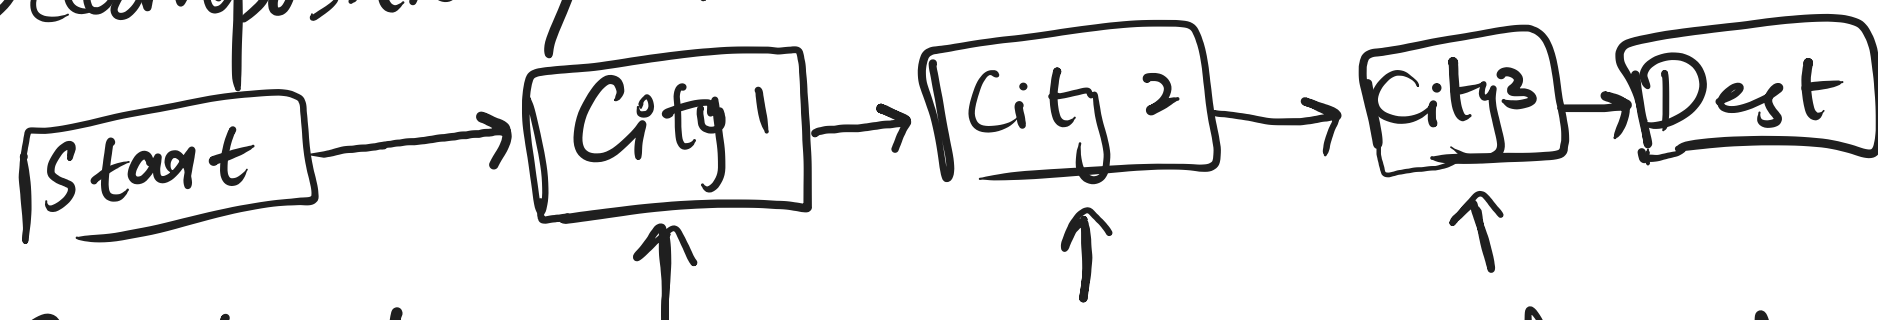

↳ Define Problem: (Make a cup of Tea)

↳ Algorithm. (Process)

↳ Program: (Code written in computer language).

↳ Output:

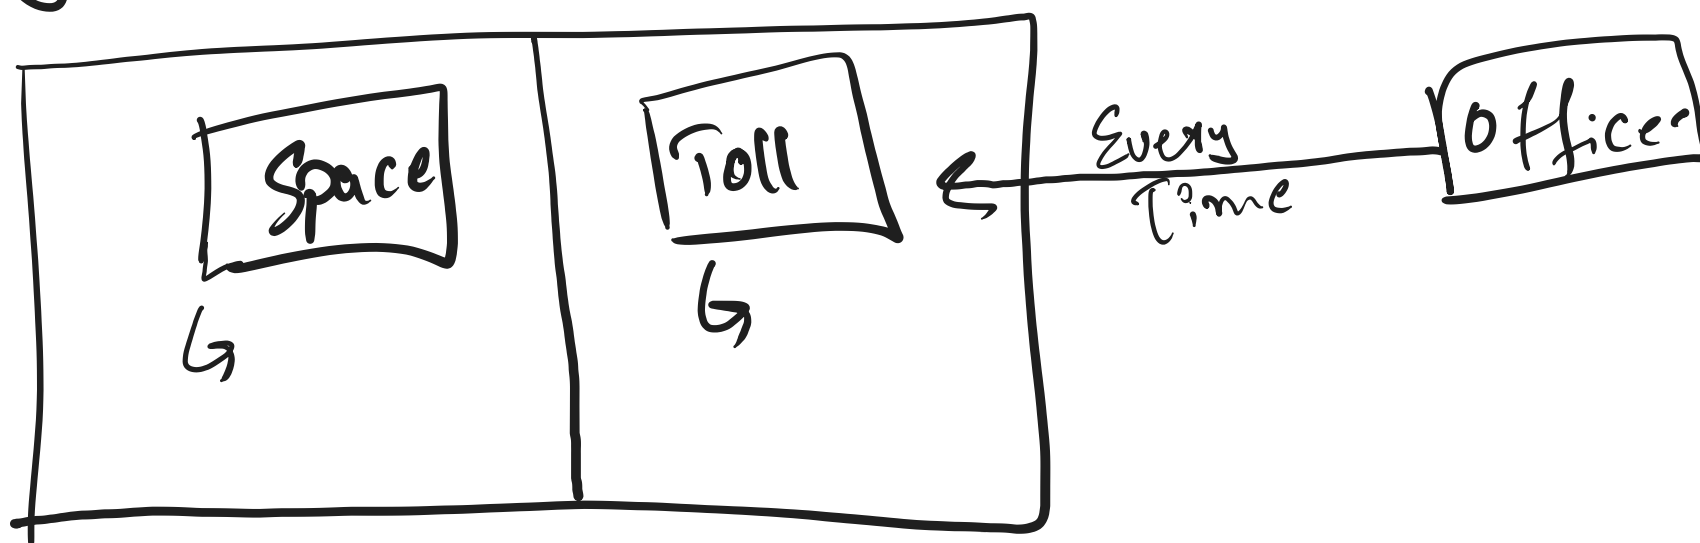

$\rightarrow$ Decomposition / Module:

$\rightarrow$ Abstract: what and when the information is required.

$\rightarrow$ Pattern:

$\rightarrow$ Algorithm:

Algorithm:

↳ Sequence (1, 2, ...)

↳ Selection (Decision making)

↳ Iteration (Repetition) (Independent)
